EDUCATION

ITESO - Instituto Tecnológico y de Estudios Superiores de Occidente

Graduation: December 2026

Software Development Engineering **GPA: 9.14/10**

PROFESSIONAL EXPERIENCE

Freelance Projects - Remote / Project-Based Contract

Custom Web Development: Designed and built responsive landing pages and hybrid websites tailored to client needs, ensuring cross-device compatibility and high performance.

End-to-End Delivery: Managed the full development lifecycle, from requirements gathering and UI/UX design to coding, testing, and deployment.

Frontend-Focused Stack: Delivered solutions primarily using **React + Vite** with **Tailwind CSS** and TypeScript, complemented by lightweight integrations when required.

Collaboration & Project Management: Worked directly with clients, applying agile practices to meet deadlines and deliver value within budget.

TECHNICAL SKILLS

Programming Languages:

Python, JavaScript (JS), Java, C, TypeScript

Tech Stack:

Cloud Services (AWS): Lambda, API Gateway, S3, EC2, SNS, DynamoDB

Backend & Runtime: Node.js, Express.js, Passport.js, Socket.IO

Frontend & UI/UX: React, Angular, Handlebars, HTML5, CSS3, Tailwind CSS

Databases: MongoDB (Mongoose)

Languages:

Spanish (Native), English (B2 Level)

PROJECTS (ACADEMIC)

Admident (GitHub: [Admident](#))

Web management app for orthodontic clinics (appointments, patients, finances).

Built with Node.js, TypeScript, Angular, MongoDB.

Implemented JWT role-based auth and responsive Tailwind UI.

HarmonyHub (GitHub: [HarmonyHub](#))

Collaborative platform for musicians to share and receive feedback on projects.

Stack: TypeScript, Node.js, MongoDB, Socket.IO.

Added real-time updates for comments and uploads.

Cinewave Studios (GitHub: [Cinewave Studios](#))

Prototype of a streaming platform with playback and content management.

Developed in Node.js + MongoDB, with media streaming and Socket.IO updates.
